

Catherine Mitchell is the Senior Director of Technology Services Group for the Enterprise Storage Division within IIP (Information & Infrastructure Products) at EMC Corporation. Catherine is a 29-year veteran in the technology industry having worked for IBM and an IBM Business Partner for eight years prior to joining EMC in 1992. Starting her career at IBM, she was a Mainframe SE and then became a Midrange SE, co-authoring an IBM Redbook during IBM's development of the AS/400 platform. She joined EMC as a Midrange Corporate Systems Engineering in Marketing supporting EMC's Midrange Storage products. She continued her career at EMC with diverse roles in Channel Sales, Customer Service and Education Services prior to moving into Product Development for her current role. She has traveled extensively internationally and studied French and Japanese for several years to facilitate her Channel Sales and Customer Service roles.

Catherine received a BS in Computer Science and Mathematics from Vanderbilt University in 1984. Catherine received the 2007 EMC President's Award for her leadership role executing EMC World, EMC's annual user conference. Catherine is a member of EMC's Diversity Council, Asian Circle, STEM program, and Women's Leadership Forum. Catherine recently earned her Masters of Science in Engineering Management at Tufts University. Catherine is an avid reader and volunteers in her community by delivering a Personal Safety and Violence Prevention curriculum for children and teens.
