

Research Associate (Position CAMP4: 2018-Q2-1)

Camp4 is a well-funded new biotech company that is leveraging a proprietary gene regulation platform to discover medicines to treat a broad range of human diseases. We are seeking a highly motivated individual to join a team focused on translating novel platform discoveries into drug development initiatives addressing areas of significant unmet need. The successful candidate will have an impactful role in empowering this cutting-edge gene regulatory technology to improve the lives of patients.

Requirements

- BS/MS degree with 2-7 years industry or academic experience
- Demonstration of productivity and success based on strong references
- Extensive molecular biology/cell biology/biochemistry background
- Enthusiasm, passion, attention to detail, being able to work in a matrix team environment, and a desire to create new medicines for patients

Summary of Key Responsibilities:

- Tissue Culture, including primary cell lines
- Cell transfections
- Real time qRT-PCR
- Western Blot
- RNA purification from mammalian cells in medium throughput format
- Data analysis and presentation with Microsoft Office applications and GraphPad Prism
