

Advancing women in science and technology by helping them build and advance their career

**WHO ARE WE?**

WEST is a learning community that provides women in the enterprise of science and technology with the inspiration, knowledge, and connections to reach their full potential. As a non-profit dedicated to supporting women advancing within the science and technology environment, we rely on collaboration and active sponsorship from industry, individuals, and related organizations, who share in that common vision. WEST events are attended by decision-makers from the life science and technology industries as well as individuals in the pursuit of career progression within STEM.

**WHY SUPPORT /MUTUAL GOALS?**

WEST sponsorship provides an excellent platform to enable and make actionable, an organization’s goals to enhance support for women in the pursuit of careers in STEM. Specifically, the programs are designed to expand women’s access to mentors, networks, and education within the relevance of STEM. As a residual impact, organizations that sponsor also have a wonderful opportunity to expand their visibility within the community through positive branding and recognition as a progressive employer who supports women in STEM.

**HOW CAN YOU ENGAGE AND SUPPORT?**

Support can be offered in a variety of formats and should align with the goals of both WEST and the respective sponsor. Examples including sponsoring signature events, workshops, networking sessions, and student scholarships, or buying group memberships or event ticket packages. Please find more details below.
